PROJECTS

- **Flood Risk Analysis & Detection**
Tools: [IOT Cloud Website, Embedded and Arduino]
 - My team specializes in creating advanced predictive models and early warning systems. We integrate GIS (Geographic Information Systems) and remote sensing to achieve precise real-time detection. By using innovative techniques like machine learning, we aim to enhance accuracy and strengthen community preparedness and response.
- **Flood Detection & Water Monitoring system using IOT**
Tools: [IOT Cloud Website, Embedded and Arduino]
 - My team creates systems that utilize real-time data from sensors and remote sensing technologies to monitor water levels and detect potential flood risks. By providing early warnings and accurate flood risk assessments, we enhance disaster preparedness and help protect communities from the impacts of flooding.
- **Static Hidden Device for Mobile Phone**
Tools : [IOT Cloud Website, GPS and Arduino]
 - This project features a discreet, stationary tool designed to secretly track or monitor mobile phones in a specific area. It works by intercepting signals or data from these devices without being easily noticed, and is often used for security, surveillance, or investigative purposes.
